Certificate Program Information

We invite your school administration, counselor or teacher to submit the names of three deserving female students for Certificate Awards. Since these awards are to honor students who excel at both math and science, please coordinate your selections between the math and science departments at your school. To ensure prompt delivery of the Certificates, please submit your nominations as soon as possible and verify that the student's names are spelled correctly. The submission deadline is three weeks prior to awards ceremony date. Certificate candidates should excel in science and mathematics with distinction or some engineering related activity, such as a science fair project or a technical paper competition. Nominated students also should be active citizens in their school and community. We hope that this program will encourage the recipients to consider a future engineering career.
